

Model #

1508RLNa

Bryce Slim Wall Mirror

RLN = Ridgeline finish

Assembly Instructions

Thank you for allowing us to help you furnish your home. We are certain you will be delighted with your new furniture for many years to come.

IMPORTANT NOTES:

- Wood can be susceptible to changing color over time when exposed to strong sunlight. Use window shades, drapes or blinds to protect your furniture. To help the surface age evenly and avoid dark and light spots, periodically move items to expose the entire surface to an even amount of light so it may develop a uniform patina.
- For normal household use only. *Not* recommended for commercial use.

- Handle the mirror with care. Glass is fragile.
- Before you begin your project, completely read the Assembly Instructions.

WARNING

Drilling, sawing, sanding or machining wood products can expose you to wood dust, a substance known to the state of California to cause cancer. Avoid inhaling wood dust or use a dust mask or other safeguards for personal protection.

G	#6 x 5/8" Philtruss Screw (inserted) 	12
H	#8 x 1-3/4" Pan Head Screw 	2
I	Mirror Frame Bracket (attached) 	1
J	Mirror Wall Bracket 	1

1508RLNa Bryce Slim Wall Mirror

Assembly Instructions

Tools Required: Phillips Screwdriver, Tape Measure, Pencil

1. Decide if you want your Mirror to hang either vertically or horizontally. If you want it to hang horizontally, remove the Mirror Frame Bracket (I) and line it up to the predrilled holes on the long side of the Mirror Frame (Ba) as in Figure 1. Attach with four #6 x 3/4" Flat Head Screws (F).

2. Determine where you want the bottom of your mirror to end and draw a faint pencil line on the wall. For a vertical placement, use a tape measure and measure up 41-5/8" from that mark. Draw a faint line. For a horizontal placement, measure up 23-1/8". Draw a faint line. The top line is where you attach the Mirror Wall Bracket (J). If you like, you can erase the faint bottom pencil mark. See Figures 2 and 2a.

Assembly Instructions

3. Locate two studs in the wall behind the space where you want to hang your Mirror. Affix the Mirror Wall Bracket (J) into the studs with two #8 x 1-3/4" Pan Head Screws (H). If you cannot locate two studs, purchase the proper wall attachment hardware for your type of wall and secure the bracket. See Figure 3.

4. NOTE: The Mirror Wall Bracket (J) angles out at the top. When you hang your Mirror, the Mirror Frame Bracket (I) fits over the angled part of the Mirror Wall Bracket (J). See Figure 4.
